

JABEZ GOH DONG HAN

BUSINESS & FINANCIAL TECHNOLOGY

Singapore · moder8ter@gmail.com · +65 8803 4375 · [linkedin.com/in/jabez-goh-79a780296](https://www.linkedin.com/in/jabez-goh-79a780296) · github.com/JabesGG · jabezgoh.netlify.app

Business & Financial Technology student at Nanyang Polytechnic who builds the web apps, data models and dashboards that turn business questions into decisions you can act on. Full-stack experience across C#/ASP.NET Core, Python and JavaScript, paired with data modelling and BI (Power BI, SQL) and cloud fundamentals (AWS, Azure).

SKILLS

DATA & ANALYSIS	Power BI · Data modelling · SQL · Technical writing
WEB & LANGUAGES	C# · ASP.NET Core · Python · JavaScript · HTML · CSS
PLATFORMS & TOOLS	AWS · Azure · Linux · Git
SPOKEN	English (native) · Chinese (proficient)

PROJECTS

ArcaneVault C# · ASP.NET Core

arcanevault.app · 2026

A trading marketplace and live catalogue for Pokémon cards

- Full-stack marketplace over a catalogue of 20,000+ cards across 173 sets, with fixed-price, auction and barter listings, condition grades and market-value guidance.
- Peer-to-peer trades with a reputation system, a credits wallet, and a “Vault Signals” economy dashboard: gross merchandise value, trade velocity, sell-through, price by rarity and holder distribution.

Market Potential Dashboard Power BI · SQL

2025

Interactive reporting that scores countries as potential markets

- Four-page report reading off one shared measure set, so a single slicer (year, region, income group) re-filters every view at once.
- Built an Opportunity Score blending GDP per capita, inflation and purchasing-power parity, with supporting views for cost-of-living and stability/risk.

GenQuest Python · JavaScript

2025

Account management for a gamified habit-tracking platform

- Built the account layer — registration, sign-in, profile management and password reset — with input validation and session handling.

EXPERIENCE

Technical Intern

2024

Innogreen Solution · Singapore

- Supported integration and maintenance of Industry 4.0 systems, including autonomous mobile robots and wearable industrial devices.
- Diagnosed hardware–software interface faults to keep automated material transport running reliably on the floor.
- Wrote technical documentation for system workflows and VR training simulations used by other staff, and presented new products to clients.

EDUCATION

Diploma in Business & Financial Technology

2025 – 2028

Nanyang Polytechnic · Singapore

Higher Nitec in Electronics Engineering

2023 – 2025

Institute of Technical Education · Singapore
